

Adaptor Plug-In 12 V DC 500 mA

Product codes:

Reference: PROPSA125
 EAN13: 5060041662242
 UPC: -

Product features:

Product description:

PSU Adaptor Plug-In 12 V DC 500 mA 2.1 mm Connector Two unregulated power units with higher current ratings, suitable for use with PROception new generation amplifiers. Both units utilise an efficient cooling-running mains transformers, fitted with an approved thermal fuse for overheat protection. Designs independently certified to relevant safety standard BS EN 60065. FEATURES proPSA125 Plug-in unit, fits any BS 1363 socket-outlet. Standard DC output connector on flying lead. Suitable for use with the proAMP310X, proAMP104X & proAMP108U new-generation amplifiers and proLINK22 & proMOD32 modulators For local powering of the amplifier, where a nearby mains outlet is available. Previous reference proPSA123 now superceeded and upgrade with the higher rated proPSA125 product. TECHNICAL INFORMATION Product Code No of RF Outputs Frequency Range Insertion Loss Connector Type DC Output Max Current AC Power Connection PROPSA125 - - - 2.1mm 12 V nom. 500 mA Plug-in (UK) These units are not suitable for powering masthead amplifiers requiring a regulated 12 V supply. Please refer to the power supply compatibility matrix to confirm the correct selection of a power supply with chosen amplifier.
