triax.uk/multiswitches

Increase the number of points around the home

- with TRIAX ECO Multiswitches.

Flexible living throughout the home with full access to a range of services.

For example, a mix of PVR's from Sky, Freeview or Freesat, plus HD TV's or DAB Radio at any location within the home. Subscription may be required for some services.

Green Line = 2 Cable Feeds

Providing full access to Satellite, Terrestrial and Radio Services and specifically designed for the UK Residential sector.

Switches are available in 5 sizes up to 32 outputs, offering a maximum of 16 independent points. (Two cables are required at each location where PVR functionality is required).

The switch is compatible with Quad and Quattro LNBs and can be used with existing Satellite dishes, TV and Radio aerials.

The small and compact design features low power consumption from a built-in UK power supply and includes a power on indicator.

This high quality, installer friendly range has been designed and manufactured in Europe and requires minimal adjustment upon installation.

Where to use:

- Homes requiring an increasing number of TV points
- House of Multiple Occupation (HMO) / Landlord Lettings
