

WHYTE / PROMAX

dSCR IRS System - Advanced Sky Q Fault Finding, Commissioning & Planning

Course duration: 9:30am-3pm
Refreshments and lunch will be provided

Course cost: This course is **FREE** to attend

If you are involved in servicing and installing dSCR or Hybrid IRS systems, this free 1 day training seminar should not be missed!

The recent uptake of dSCR technology has introduced many technical challenges to the installer. You will learn how to plan, commission and test dSCR and Hybrid IRS systems quickly and easily. Learn how to identify and resolve reception problems associated with SkyQ on live dSCR IRS systems using the latest Promax spectrum analysers.

This training will cover: -

- Hybrid dSCR IRS system planning (Practical)
- dSCR IRS system commissioning and testing (Practical)
- RF signal measurement (Theory)
- User band/transponder signal measurement (Theory & Practical)
- dSCR IRS system fault finding (Practical)

This course is essential for all IRS System Installers.
Fault finding and resolving will be covered in theory and practical.
