***IT'S FAST...***

***...REAL FAST.***

## New flute design

Unique design ensures  
28% faster removal of waste.

## Speedhammer Plus

Speed optimised  
cutting angle.

## It's fast. Real fast.

A series of major design innovations make the IRWIN new Speedhammer range of drill bits, for use with SDS\* drills, faster and tougher. They benefit from our radical new twist on the single flute design to really speed up drilling times. With 28% greater flute capacity, drilling time is up to 30% faster. The innovations offer it all. Extra speed. Extra strength. Less clogging. And less effort to use. The new Speedhammer range - it's time to reconsider the double flute.

## SPEEDHAMMER PLUS™

### Up to 20% quicker and much easier.

Speed. That's what sets the Speedhammer Plus apart. With 28% greater flute capacity, the innovative design goes straight in and straight out. It removes dust and debris really fast. And it's particularly effective in uncured concrete due to clog-free performance.

Speedhammer Plus

\*SDS is a registered trademark of Robert Bosch Tools.

Old 90° head.

### **Speedhammer Max**

New, patented head design with optimum 53° cutting angle for more aggressive cutting.

## **SPEEDHAMMER MAX.™**

**Aggressive angles and up to 30% quicker.**

In addition to the new single flute design, the Speedhammer Max has added advantages. For a start, it has a new 4-cutter carbide head design. The tough carbide allows the use of an extra short head to ensure drilling dust goes directly into the special single flute. We also tested extensively to find the optimum cutting angle of 53°. So you benefit from the most aggressive cutting performance with faster evacuation of waste.

### **Faster and safer in the long run.**

With less time in your hands, vibration is less of an issue. So the Speedhammer Max is faster in the short term. And safer in the long term.

## **Straight Shank for MASONRY, GRANITE and CORDLESS.**

Three straight shank options provide more choice. The new single flute design (already proven on the CORDLESS option) is now available on MASONRY and GRANITE bits. They also have new colours and new packaging labels to make identifying the right product much easier.

**MASONRY** – ideal for general purpose masonry drilling.

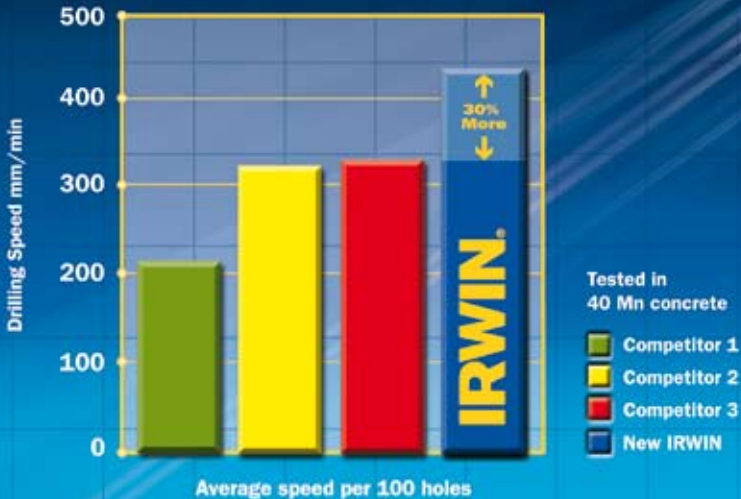

**GRANITE** – great for drilling into very hard materials.

**CORDLESS** – best performance in cordless drilling machines.

Speedhammer Max 22 x 540mm

## Researched to see what you want.

Several years of research went into identifying what you wanted most. That's why the new Speedhammer range delivers the extra speed and durability you asked for.

## Outperforming the competition.

Take a look at the evidence. Against leading competitors, our unique design is the clear leader. See for yourself.

## The best drill bits. The best choice.

The new Speedhammer range are purpose-designed drill bits made for faster drilling through concrete. Up to 30% faster. Whether for everyday use, for tougher applications or for specific jobs (like masonry, granite or cordless operation) IRWIN has the tough, easy-to-use and, above all, fast drill bit you need.

## Take the challenge.

We challenge you to test any new IRWIN Speedhammer product. Compare it to any other option. See how much slower and harder to use the double fluted alternatives are compared to this new design. For the long-life durability, speed and value, you won't find a better option. Try it. You won't go back.
