

OPT-TX RP

Home fibre

Optical transmitter that can distribute up to 4 satellites on a single fiber using CWDM (Coarse Wavelength Division Multiplexing) technology. **Innovative solution that allows the transmission of the entire TV band, FM, and an orbital position on a single fiber.** Output power 7 dBm SAT + TV + FM, wavelength 1310 nm. (dimensions 230x230x50mm). The transmitter can be installed near the dish in a waterproof box thanks to the **separate power supply**.

Technical Chars

- Installation of **conventional type dish**
- **Transmitter equipped with AGC** that allows the use of dishes of different diameters.
- Cascade solution typical of MSW systems
- **Up to 21dB optical attenuation of tract**
- Easy and intuitive installation
- Full terrestrial band transmission
- Tele-powered
