

UX-QT LTE

Quattro LNB with 4 separate polarities outputs H/V and LTE shielding, Sky Italy approved

- UX LNB Serie guarantees an optimal signal reception and they fulfil every system requirement: from **single distribution** to **complex multiuser** or hospitality plants.
- Maximum reception quality for all high definition programs.
- A blocking **LTE filter** has been incorporated to avoid interference with signals intended for mobile telephony; thanks to the integrated LTE filter, the LNB is immune to any interference due to LTE satellite band transmissions.
- **Low noise figure** and high reliability.
- Small size.
- Low consumption.
- Some models are approved by Sky.

CODE	287302
Description	Quattro LNB with 4 separate polarities outputs H/V and LTE shielding, Sky Italy approved
Outputs	4
Gain	57
Consumption	160
LTE protection	-60
