## Trust TRIAX Experts in headend technology

### Proud heritage

With trailblazing technology at our core for over 70 years, we're proud of where we come from. And we're proud to keep innovating each day, connecting our customers to the future.

Our expanded headend range is the truest expression of our values of reliability and innovation.

And now, we have a headend to suit the requirements of every installation size and budget.

### TV delivered your way

You know what your customers need, and our flexible headends make your choice easy. Whatever your preferred configuration, you can rest assured that each and every TRIAX headend guarantees the same quality TRIAX experience, saving you time and costs, and increasing your own customer loyalty.

Our headends are developed from the ground up at our headquarters in Denmark, with over 24,000 sold in the last decade alone.

## Headend benefits

### TIME SAVED

- No retuning of in-room TV sets
- Quick installation with re-configured solutions
- Remote access to all your headend installations

### COSTS SAVED

- Benefits through advanced technology
- End-to-end TRIAX hardware
- One point of contact, one stop shop
- A headend for every budget

### LOYALTY INCREASED

- Outstanding reliability, reduced down time
- Remote access for quick configuration changes
- Smoothly integrated solutions

### FUTURE READY

- Free software updates
- Modular (TDH 800 & TDX)
- Scalable (TDX)
- IPTV ready (TDX)

### TDcH Compact Headend

- Decryption of satellite, cable and terrestrial signals
- Optimised channel setup with advanced multiplexing
- No need for retuning TV sets in rooms
- Pre-configured for quick installation and reduced costs

IN	OUT
DVB-S/S2 DVB-T/T2 DVB-C	QAM COFDM

### TDH 800 Modular Headend

- Modular for high flexibility and individual requirements
- Separated input and output modules for easy upgrade
- HDMI and AV input modules available
- Modules for supporting old PAL TV sets

DVB-S/S2 DVB-T/T2 DVB-C HDMI AV	QAM COFDM PAL HD
---	------------------------

### TDX Scalable Headend

- Top of the range: maximum flexibility and power
- Ready for IPTV solutions
- Scalable: combine up to 3 headends
- DRM integration for distributing premium content

DVB-S/S2 DVB-T/T2 DVB-C HDMI AV IP	QAM COFDM PAL HD IP

### Trust our customers

Our vision is to be the preferred connectivity partner to professionals. We take pride in our reliable products and outstanding service, but don't just take our word for it: here's what some of our customers have to say. Read more at [triax.com/references](http://triax.com/references).

*"We have been using TRIAX's reliable headend systems for several years. This has convinced us to also rely on TRIAX for subsequent projects."*

Thomas Banhardt  
Owner, Feldberger Hof, Germany

*"TRIAX understands what is important. Their headends are recommended for their expandability combined with low maintenance effort."*

Wolfgang Kerz  
Antennentechnik Redmann GmbH

The all-new TDcH compact headend from TRIAX

# Compact excellence

Exquisite engineering, finely tuned for perfect performance.

Your natural choice for swift, efficient TV distribution.

Infinite possibilities

## TDcH Compact Headend - New platform, new benefits

Built on our cutting edge new software platform, the opportunities with TDcH are endless. Complimentary updated software offers new and existing customers additional functions and benefits, along with new hardware configurations to match your requirements.

### Compact excellence

- Exquisite engineering, finely tuned for perfect performance
- Your natural choice for swift, efficient TV distribution
- Save time and costs, with fast, easy installation and remote management
- Compact design fits elegantly into 19" racks
- Reliable, innovative headend expertise from TRIAX

### Smooth integration

- Optimised channel setup with advanced multiplexing and IP Pool technology
- Integrated SCR multiswitch\* for cost, time and space saving
- No need for retuning TV sets in rooms thanks to PID Management
- EPG Management ensures full electronic programme information for better user experience
- Pre-configured for quick installation and reduced costs
- Central decryption with CI slots, Free-To-Air version available
- Multiple language service allows for multiple distributions of a service with different audio (language) tracks

### Integrated SCR Multiswitch\*

- Increases the number of satellite positions that can be received in the TDcH
- Increases the number of international TV services that can be distributed
- Save time, cost and space with less cabling and no need for an external multiswitch
- Reduced hardware for a cost optimised and compact solution

### IP Pool and Multiplex technology

- 16 input DVB-S/S2 and 6 DVB-T/T2/C input signals
- 16 QAM or COFDM full band modulators (switchable)
- 8 x CI interfaces for CAM
- Multiplexing at both output and CAM (CI interface)
- Optimised service line-up within the available input and output modules
- More relevant TV services due to service filtering and multiplexing

### Energy-saving – long-term reliability

- Only 90 W power consumption
- Temperature controlled cooling system with integrated fans - increases the service life of the equipment
- The cooling system supports 19" rack mounting as well as wall mounting

 Art. No.: 692890  
 EAN Number: 5702666928906

## TDH 800 Modular Headend - the all-rounder with innovative Pool technology

The TDH 800 headend is ideal for those looking for a flexible, compact and reliable solution, with a range of input and output modules for all popular TV distribution formats. If you need additional features such as multi unit or IP-in/out, then please select the TDX headend.

### Easy installation

- Housing designed to accommodate up to 16 input and 6 quad output modules, making it possible to support 12 CAM modules
- Can easily be installed on a wall or a 19" cabinet
- All input and output modules as well as all cables can be accessed and operated easily from the front
- Input and output modules identified via TRIAX supplied labels
- DiSEqC 1.0 functionality
- Saves time on installation

### Intuitive configuration

- Browser-based user interface configuration without additional software
- Easy, intuitive step-by-step configuration
- The four adjacent output channels per output module can be freely selected across the full frequency range
- MUX bandwidth monitor to ensure that the MUX is not overloaded
- PID Management – No need for retuning TV sets in rooms when services are changed
- LED to indicate operation and errors on each module

### Effortless service handling

- Input modules are independent of output modules, resulting in a smaller number of modules overall. Fewer modules – allows easy spare part handling
- Log file on all TDH 800
- On-location access to the TDH system for installer and/or TRIAX support

### IP Pool and Multiplex technology

- Up to 16 input modules in a combination of DVB-S/S2, DVB-T/T2, DVB-C, AV and HDMI in
- Up to 6 Quad-output modules for up to 24 channels in any combination of PAL, QAM, COFDM
- More relevant TV services because of service filtering and multiplexing
- Output modules support up to 2 CAM modules. With full configuration per base up to 12 CAM modules possible
- IP Pool-Technology - Input and Output modules are independent of each other

### Energy-saving – long-term reliability

- 16 tuners and 6 backends fully loaded - only 280 W power consumption
- Intelligent cooling system with integrated fans – increases the service life of the equipment
- The cooling system supports 19" rack/cabinet mounting

## TDX Scalable Headend - quite simply a revolution

The professional TDX headend is cutting edge technology for those who place the highest demands on flexibility and performance. It is a true IP headend with revolutionary technology – ideal for the supply of all TV signals.

### Smooth installation and configuration

- Easy installation on a wall or a 19" cabinet
- All input/output modules and cables are easily accessible from the front
- Browser-based user interface configuration without additional software
- Simple and intuitive step-by-step configuration
- DiSEqC-compatible when using a multi-switch as for input distribution
- MUX bandwidth monitoring to avoid overfilling MUX
- Halved installation times due to easy programming

### Maintenance and service made easy

- New modules are automatically recognised and configured
- Log file on all TDX activity
- Easy on-site or remote access to the TDX for the installer and/or the TRIAX support
- Fewer modules – allows easy spare part handling
- SID/PID remapping: no re-programming of the TV sets following channel changes
- LCN (logic channel numbering): create individual programme list and save it as SD and HD programme
- Manage and customize EPG data

### IP Pool and Multiplex technology

- Up to 16 input modules in a combination of DVB-S/S2, DVB-T/T2, DVB-C, AV, HDMI and IP-in
- Up to 6 Quad-output modules for up to 24 channels in any combination of PAL, QAM, COFDM and IP out
- More relevant TV services because of service filtering and multiplexing
- Output modules support up to 2 CAM modules. With full configuration per base up to 12 CAM modules possible.
- IP Pool-Technology - Input- and Output modules are independent of each other

### Multi-Unit for more power

- Combine up to three TDX-Headends as one system
- Up to 72 PAL, QAM or COFDM channels (around 280 HD-programs or 570 SD-programs)
- High output level at 103 dBµV for interference free reception

### Future-proof and energy-saving

- IPTV to support different end-user devices.
- Scalable to adapt to new requirements (additional TV services or new technologies)
- A fully loaded headend with 16 inputs and 6 outputs modules consumes only 280 watts
- Intelligent cooling system with integrated fans increases the life of the equipment

## Distribute premium IPTV services Using the TRIAX TDX headend

Distributing premium content across multiple rooms in a secure way is an increasing challenge that hotels need to solve. Therefore headends and TV solutions with DRM technology are a good and safe choice.

TRIAX TDX headends have a solution for this challenge. They now offer DRM solutions for both LG and Samsung hospitality TVs.

Once again the modular concept of the TRIAX TDX headend proves to be a future proof choice. The DRM functionalities can be included in both new installations and TDX headends already running in the market.

### Software licences

	Art. No.	EAN Number
<b>IPTV-in</b>		
TDX IPTV-in 4 service - Start	418047	5702664180474

## MOD101C HDMI to QAM Modulator

The MOD101C modulator has a high definition HDMI input (1080p, MPEG4), and a QAM output which is combined with the RF input. The HDMI input content can be supplied by a number of sources: blu-ray player, satellite set-top box, CCTV etc. The input signal is modulated as a QAM output and can be distributed to a number of TVs over an existing private coaxial network. The modulator can combine existing RF with the modulated output channel on the RF output. The modulator has adjustable level control to balance the QAM channel with the incoming RF channels. The MOD101C Modulator can be set up via the front panel and LCD screen.

- Auto detection of HDMI format
- HDMI input supports multiple video format compatibility up to 1080p and multiple audio format compatibility including MPEG-1 Layer II.
- Editable video and audio parameters, PMT, PCR, PIDs, NIT, LCN, Service Name
- All inputs and outputs on one side for ease of installation
- Combine existing RF with the modulated output channel
- Fully agile QAM output frequency
- Adjustable level control to balance the QAM channel with the incoming RF channels
- Set up via the front panel and LCD screen

## MOD103T HDMI to COFDM Modulator

The MOD103T modulator has an HDMI input with local loop through, and a COFDM output which is combined with the RF input. The HDMI input content can be supplied by a number of sources, Blu-ray player, Satellite Set top box, CCTV etc. The input signal is modulated as a COFDM output and can be distributed to a number of TVs over an existing private coaxial network. It has an HDMI loop through to connect to the local TV, and can also combine existing RF with the modulated output channel on RF Out 1 and RF Out 2. The modulator has adjustable level control to balance the COFDM channel with the incoming RF channels. The source set top box can be controlled from another TV location via the IR remote control over the coaxial cable, using an IR transmitter and a digital link. The coaxial network must be connected to the RF Out, with the 9vdc able to pass through the network, to remotely power the digital link. The MOD103T Modulator can be set up via the front panel and LCD screen.

- New compact design
- All inputs and outputs on one side for ease of installation
- HDMI loop through for connection to the local TV
- Combine existing RF with the modulated output channel on RF Out 1 and RF Out 2
- Fully agile COFDM output frequency
- Adjustable level control to balance the COFDM channel with the incoming RF channels (1dB steps)
- Source set top box etc. can be controlled from another TV location using an IR emitter and a digital link (included)
- Set up via the front panel and LCD screen
- Firmware update via USB interface

<b>ORDER INFORMATION</b>		
Art. Number	300126	300128
EAN Number	5702663001268	5702663001282
<b>CHARACTERISTICS</b>		
Audio Compression	MPEG-1 Audio Layer II (ISO/IEC 11172-3)	MPEG-2, AAC
Audio Input	Stereo, HDMI	Stereo, HDMI
Code rate		1/2, 2/3, 3/4, 5/6, 7/8
Constellation		QPSK/16QAM/64QAM
Guard Interval		1/4, 1/8, 1/16, 1/32
MER	dB	>36
Number of carriers		2K / 8K
Output level	dBμV	< 95
Video Compression	H.264/AV	H.264 4.0
Video Input		HDMI
Video resolution	Pixel	Up to 1080p@30Hz
<b>FREQUENCY</b>		
Bandwidth	MHz	6/7/8
Frequency range	MHz	100 - 860
<b>RETURN LOSS</b>		
LCN		Up to 1023
PID settings		PMT/Video & Audio / PCR
PSI		HID/ONID/P.D.S/TS ID
Screen Resolution		800x600 / 1024x768 / 1280x600 / 1280x720 / 1280x768 / 1360x768 / 1366x768
<b>ELECTRICAL</b>		
Impedance	Ω	75
<b>OPERATIONAL</b>		
DC Operating voltage	VDC	12
Power Consumption (typ.)	W	8
PSU/adaptor INFO		Included Euro Plug (CEE 7/17)
<b>CONNECTORS</b>		
Connector IN		HDMI female (Type A)
Connector OUT		F-female
Input connector		HDMI, F-terrestrial loop through
<b>MECHANICAL</b>		
Display		LCD panel and buttons
Mounting		Wall mount
Net Weight	kg	0,480
Packing QTY		1
Product Depth	mm	150
Product Height	mm	36.5
Product Width	mm	150

## Explore TRIAX Solutions

[solutions.triax.com](http://solutions.triax.com)

TRIAX is a global supplier of reliable, innovative products and solutions for the reception and distribution of video, audio and data signals.

Our Products are used in homes, businesses and operator networks by broadcasters, satellite, cable and telecom operators.

Our Solutions combine our hardware and software expertise to deliver value to hospitality and related markets, through a partner network of system integrators, large installers and operators.

TRIAX's headquarters, production and R&D base is in Denmark. With 9 international sales subsidiaries we operate in more than 60 distributor countries. In 2021 TRIAX merged with Ikusi Multimedia to form a combined company of 300 employees jointly owned by Polaris Private Equity and Velatia Group. See [www.triax.com](http://www.triax.com) for further info.
