ACCESSORIES/ DBB Range - Combined Exit button and EDR

Product description

The range of emergency door releases (EDR's) from CDVI provide a physical method of unlocking an electronic lock in the event of an emergency.

These combined units are supplied in a purpose made double gang surface back box, which means the unit can be installed quickly ensuring an exact fit for a tidy installation.

The exit button options are stainless steel or high impact green dome, which is particularly suited for users who require a larger "target" button - in homes for the elderly, for example. The EDR's are supplied double pole as standard, and available as traditional break-glass or resettable.
