KEYPADS/ PROFIL100E-INT - Self-contained Keypad

Product description

The PROFIL100E-INT is a narrow style, high quality, stainless steel keypad with soft blue backlighting. It is ideal for mounting onto door frames or areas where a mullion style keypad with ruggedness and aesthetics are important.

Its construction, and high resistance to vandalism, makes the PROFIL100E-INT suitable to external sites such as parking, industrial, public, commercial, retail and residential areas.

Backlit keys assist in low-light conditions, and the option that allows users to change their own codes and 2 relays as standard, increase the flexibility of the products.

Digicode®

Key features

- Narrow style keypad with integrated electronics
- High resistance to vandalism
- Up to 100 user codes
- Audible and visual feedback (LED's)

Product Information

Material: Stainless steel

Technology: Digicode®

Codes: up to 100, 4-6 digit PIN

Mounting: Surface mount, Diax® security screws

Input Specifications

1 Request to Exit

Timer for trade function

Output Specifications

Number of relays: 2 Form C,
6A at 250V, 1A at 120V

Adjustable time: 1-99 seconds

Electrical Specifications

Operating Voltage: 12V to 24Vac / 12V to 48Vdc

Consumption: 25 to 80mA
