ACCESSORIES/ RTE-WIR - Wave Infrared Exit Switch

Product description

RTE-WIR is an infrared exit switch. Infrared detection activates the switch with a wave of the hand which is adjustable between 3-15cm, allowing activation without direct contact with the device. This is ideal for sterile environments and general high traffic areas such as hospitals, public buildings etc.

The RTE-WIR can be connected directly to an access control device to be used as an exit button. The bi-coloured LED indicator provides visual verification to the user.

Key features

- Infrared exit switch
- "No Touch" activation
- Adjustable timing & detection range
- Surface mount
- Multicoloured LEDs

 *Certification*

 *DEEE*

 *Certification*

 *-20°C to 55°C*

Product Specifications

Material: Stainless steel finish,
black ABS back box

Mounting: Surface

Switch type: Infrared detection

Relay timed: 0.1-30sec

Relays: Single pole NO/NC/COM

Distance adjustment: 3-15 cm

Electrical Specifications

Power input: 12-24Vdc

Contact rating: 2A @ 24Vdc
