

DVB-S/S2 SATELLITE HUNTER

The SATHUNTER+ is an instrument designed for the installation of Direct To Home (DVB-S/S2) satellite reception systems. It is fully automatic and very easy to use. Just turn the dish and the instrument will show up the identification of the selected satellite when it is detected. The instrument is actually reading the information transmitted by the satellite and displays its orbital position and the service list.

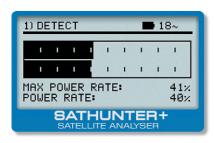

Easy to use

1.-Detection

It detects signal from any analogue or digital satellite thanks to the built-in wide band detector. In this mode the meter behaves like a satfinder and shows information about the received signal power in the form of two graphic bars with two different time constants and an audible indicator.

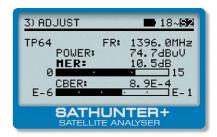

2.- Identification

Once a satellite signal has been found it is possible to confirm with no possibility of error if the received satellite corresponds to the one desired. To do that the **SATHUNTER+** reads information from the tranport stream tables at the preprogrammed test frequencies.

It allows to make proper digital measurements such as channel power, MER or CBER. All information is displayed on the screen in a very convenient way so that optimising dish alignment becomes really easy. MER and CBER in particular are shown in numbers and a graphic bar as well.

DVB-S/S2 SATELLITE HUNTER

Selective identification

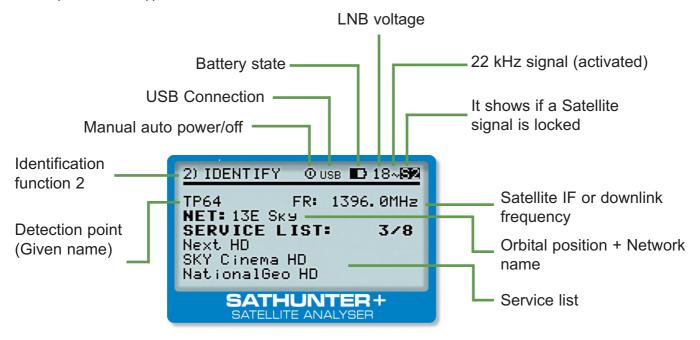

The equipment can be programmed for a specific application, dish alignment for a specific satellite for instance. This could be the case of installers working for a particular DTH platform that want to eliminate any possibility of error and the related waste of time. Equipment settings can be modified at will using a PC computer and the supplied software.

Identification of up to 50 satellites

In **IDENTIFICATION** (2) mode, the equipment reads the information it receives from the satellite, presenting the orbital position and name of the service or satellite for a maximum of 50 satellites that can be programmed as the user deems appropriate.

Detection of short circuits and protection

The equipment allows detection of excessive LNB consumption. Outages in the cable or faulty LNB operation will be indicated by the equipment. It also has a short circuit detection feature.

Long-life battery (Li-Ion)

Given the high consumption of LNBs, one of the fundamental features for this type of portable instrument is battery operating time.

The **SATHUNTER+** has been designed to allow continuous supply to universal LNB for over two hours.

Battery charging time is about 2 hours

but 70% of the total battery capacity is recovered in the first hour thanks to Li+ technology. Using the adapter cable shipped with **SATHUNTER+**, the equipment can be charged from a vehicle's cigarette lighter in route to jobs.

A universal charger is also delivered with the equipment.

Rough Construction

All details have been taken into account in the design of the **SATHUNTER+**.

It is a portable meter for outdoor use with a water resistant front panel and a sturdy ABS case. It uses a very comfortable replaceable RF input connector. The instrument comes with a hard transport case.

SATHUNTER+

SPECIFICATIONS	SATHUNTER+
TUNING	
Frequency range	950 MHz to 2150 MHz
Measurement points	50 maximum
RF INPUT	
Impedance	75 Ω
Connector	Universal, including BNC, DIN and F interchangeable adapter
Level range	30 dBµV to 110 dBµV
Maximum signal level	120 dBµV
	120 054
DVB-S SIGNAL PARAMETERS	0.4514
Symbol rate	2 to 45 Mbauds
Roll-off (α) factor of Nyquist filter	0.35
Code Rate	1/2, 2/3, 3/4, 5/6, 7/8
Spectral inversion	Selectable: ON, OFF
DVB-S2 SIGNAL PARAMETERS	
Symbol rate (QPSK)	2 to 45 Mbauds
Symbol rate (8PSK)	2 to 45 Mbauds
Roll-off (α) factor of Nyquist filter	0.20, 0.25 and 0.35
Code Rate (QPSK)	1/4, 1/3, 2/5, 1/2, 3/5, 2/3, 3/4, 4/5, 5/6, 8/9, 9/10
Code Rate (8PSK)	3/5, 2/3, 3/4, 5/6, 8/9, 9/10
Spectral inversion	Selectable: ON, OFF
DVB-S / S2 MEASURES	Power: 40 to 100 dBμV
DVD 07 02 INEAGONES	0 to 25 dB
	CBER: 1E-6 to 1E-1
	VBER (DVB-S only): 1E-8 to 1E-3
	LBER (DVB-S2 only): 1E-8 to 1E-3
CIONAL DADAMETERO	EBER (BVB SE SHINY). TE S to TE S
SIGNAL PARAMETERS	
Spectral inversion	Automatic
Quality level for acceptance	Definable by user
Initial values	MER = 5 dB
Displayed information	Satellite's Azimuth and orbital position if it is detected. Service name,
	the 32 first services and network or bouquet, if it is detected.
Configuration of measurement points	Visual indication of DVB-S or DVB-S2 synchronized signal. By serial connection to PC (cable and program included)
·	, , , ,
EXTERNAL UNITS POWER SUPPLY	Through the RF input connector
Output voltage	13 V, 18 V ± 1 V
Maximum output current	300 mA
22 kHz signal	Selectable
Voltage	0.6 V ± 0.2 V
Frequency	22 kHz ± 4 kHz
BACK-LIGHT DISPLAY	Automatic
POWER SUPPLY	
Battery	7.4 V 2.2 Ah Li-Ion battery
Low battery indication	Acoustic indication and a message on the display
Charger	Built-in. It disconnects the powering when the charging process ends
Autonomy	80 min. typically, powering a universal LNB and identifying a signal continuously
Charging time	100 min. approx. (*)
	90 - 250 V/50-60 Hz (included), 12 V DC, 20 W
Mains Adapter	
OPERATING ENVIRONMENTAL CONDITIONS	Up to 2000 m
OPERATING ENVIRONMENTAL CONDITIONS Altitude	Up to 2000 m. From 5 °C to 40 °C
OPERATING ENVIRONMENTAL CONDITIONS Altitude Temperature range	From 5 °C to 40 °C
OPERATING ENVIRONMENTAL CONDITIONS Altitude Temperature range Max. relative humidity	
OPERATING ENVIRONMENTAL CONDITIONS Altitude Temperature range Max. relative humidity MECHANICAL FEATURES	From 5 °C to 40 °C 80 % (up to 31 °C), decreasing lineally up to 50 % at 40 °C
OPERATING ENVIRONMENTAL CONDITIONS Altitude Temperature range Max. relative humidity MECHANICAL FEATURES Dimensions	From 5 °C to 40 °C 80 % (up to 31 °C), decreasing lineally up to 50 % at 40 °C 180 mm (W) x 95 mm (H) x 50 mm (D)
OPERATING ENVIRONMENTAL CONDITIONS Altitude Temperature range Max. relative humidity MECHANICAL FEATURES	From 5 °C to 40 °C 80 % (up to 31 °C), decreasing lineally up to 50 % at 40 °C
OPERATING ENVIRONMENTAL CONDITIONS Altitude Temperature range Max. relative humidity MECHANICAL FEATURES Dimensions Weight	From 5 °C to 40 °C 80 % (up to 31 °C), decreasing lineally up to 50 % at 40 °C 180 mm (W) x 95 mm (H) x 50 mm (D) 480 g.
OPERATING ENVIRONMENTAL CONDITIONS Altitude Temperature range Max. relative humidity MECHANICAL FEATURES Dimensions	From 5 °C to 40 °C 80 % (up to 31 °C), decreasing lineally up to 50 % at 40 °C 180 mm (W) x 95 mm (H) x 50 mm (D) 480 g. Mains power adapter, Car lighter adapter, F to BNC/DIN/F adapters,
OPERATING ENVIRONMENTAL CONDITIONS Altitude Temperature range Max. relative humidity MECHANICAL FEATURES Dimensions Weight	From 5 °C to 40 °C 80 % (up to 31 °C), decreasing lineally up to 50 % at 40 °C 180 mm (W) x 95 mm (H) x 50 mm (D) 480 g.

(*) Charging time estimated for a temperature range between 5 to 45 °C. Outside this range of temperatures, the charger will not initiate the charging process. At high ambient temperatures, the charging process will not be carried out in continuous mode because the charger circuit has a heat-protection device that disconnects this circuit when it is over 45 °C, returning to connect itself when it is above 40 °C.
