

GI-SAS1 Steel Armour Stripper:

Fibre Integrated Reception System

- Simply removes steel armour tape.
- Heat treated for longer life.
- Unique counter rotation mechanism.
- High-strength alloy steel.

Specifically designed and engineered to aid in the simple but effective removal of the steel armour protection around the Global Invacom GI-3.0 range of fibre cables. Two or three turns of the counter rotation mechanism allow enough of the steel armour to be simply cut and removed without damaging the fibre optic cables within.
