SURVEILLANCE CAMERAS

Meet our updated camera line. This line replaces our now sunset cameras line and mounts. These updated models offer all the advancements in camera technology including superior night vision, defender technology as well as an onboard mic & speaker. Taking advantage of this new technology, enabled features making our software NVR and surveillance experience a winning solution! Currently offer models in turret, bullet and dome style as well as a PTZ. The 4-megapixel models offer the best-in-class features at their price point. The 8 megapixel models add siren and strobe deterrents, improved night vision, analytics and image quality. The PTZ offers 4x optical zoom, Person & Vehicle auto-tracking and siren and strobe deterrents.

Features

Color night vision technology

Redefining image quality and intelligence by combining advanced AI-ISP chips with cutting-edge image processing algorithms. It restores 50% more details, reduces motion blur by 70%.

Onboard analytics

Our advanced motion detection technology offers precise target identification, distinguishing between vehicles and humans with exceptional accuracy. By focusing on these specific targets, it reduces false alarms and ensures reliable monitoring, making it ideal for diverse security scenarios.

EL-IP-4FT/B/D

Surveillance Cameras

Smart White Light

When dark, the IR will turn on for basic night vision. When a target is detected from the onboard analytics, the white light turns on, enabling full color. IR light reactivates once the target leaves to minimize light pollution for your home.

Deterrent Technology

When an event is triggered, the camera can flash onboard lights, alerting the person that they are being watched.

On applicable SKU's (8MP/PTZ), the onboard Red & Blue lights can be strobed. An audible alert can also be broadcast, further alerting an intruder for a more impactful alert.

Onboard Mic & Speaker

With the onboard microphone you can record audio from the SW NVR (when enabled). Use the onboard speaker enables the camera to be an intercom target for two-way talk from any interface, local or remote. Only with the power of ELAN, making your world easier.

Mounts

Making it easy for dealer, we have two mounts, one black and one white. Both mounts are Junction box style and are compatible with Bullet and Turret models in both 4MP & 8MP models. The PTZ includes a mount.
