

CCTV Extension Cable

Available in 5m, 10m and 20m.

PROCCTV050M - 5m.

PROCCTV100M - 10m.

PROCCTV200M - 20m.

High quality RG59 cable and pre-fitted BNC and DC plugs, for ease of power and video and power in one cable.

Kit Contents:

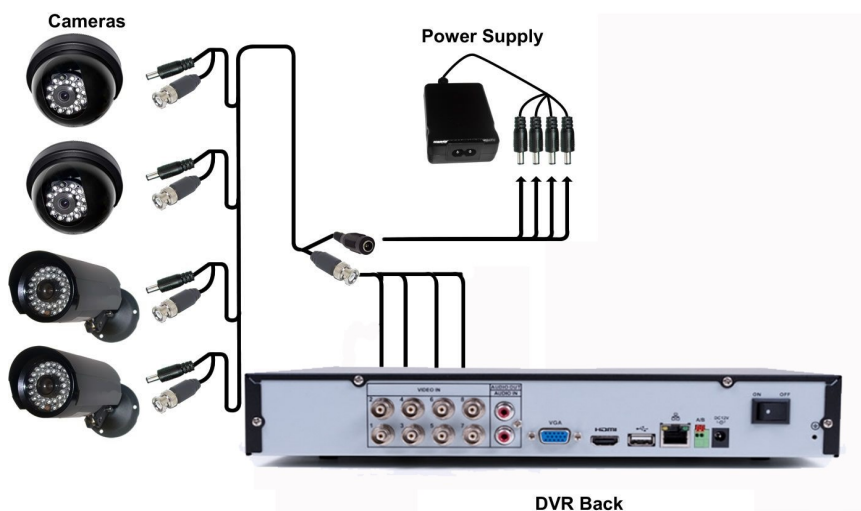

- RG59 + 2 video and power extension cable with BNC + DC connectors.
- Back to back BNC coupler.

Features:

- Professional quality video cable.
- Dual cable saves time.
- Designed to carry the video & power between camera & DVR.
- BNC cable for video and DC power.
- Works with all older analogue and the newer HD standards such as TVI, AHD and CVI formats.

Instructions:

1. Connect both the BNC and DC plug to the camera fly lead.
2. On the other end of the cable, plug the BNC plug into the DVR and connect the DC socket to the power supply.
3. If extending an existing cable, use the back to back BNC coupler to join the two together.

Top Tip: If you need to shorten the cable, use our universal BNC plug (PROCON52) as well as one of our DC plugs (PROCON70) or DC sockets (PROCON71), depending on the connection required.
