

PROHDMIAUDEXT11

HDMI /MHL Audio (SPDIF+R/L) Extractor

With ARC Function

This audio extractor supports 3D, 4KX2, ARC and it allows a HDMI or one MHL source input to one HDMI output to connected to a HD Display (for example a TV or Projector). It will extract the audio to one SPDIF audio out and a left and right Stereo audio out. This device also supports ARC function. This device offers a solution for security, data center control, information distribution, conference room presentation, school and corporate training environments.

Kit Contents:

- Audio extractor.
- 5V 1A power supply.
- User manual.

Features:

- One HDMI MHL input converter to HDMI, SPDIF and one left and right audio out.
- Output audio supports: SPDIF+R/L analog audio output.
- Supports 1080P, 3D and 4K 2K resolution.
- Supports ARC Function: reverses the audio to the AV amplifier through HDMI Cable connected to the TV while the TV still receives audio and video.
- Three audio modes ADV / 2.0CH / 5.1CH options.
- LED indication when source or sink is active.
- Easy to install.

Instructions:

1. Use a high quality HDMI cable (we suggest PROception HDMI leads) to connect the HD source with the HDMI input port of the converter or use one MHL TO HDMI Cable to connect the MHL compatible device with the HDMI input port of the extractor.
2. Use a HDMI cable to connect the extractor's HDMI output port with the HD Display.
3. Use a phono audio cable to connect the extractor R/L port with the audio equipment.
4. Use an optical cable to connect the SPDIF port with the audio equipment.
5. Switch ARC on if required.
6. Connect the extractor with the 5V DC power adapter (supplied).

PROHDMI AUDEXT11
HDMI /MHL Audio (SPDIF+R/L) Extractor
With ARC Function

DC5V: 5V DC power input.

PWR: Power LED status light.

HDMI/MHL IN: HDMI/MHL dual mode input ports.

ARC: Switch on if required.

Switch button for Audio output mode: Choose between 5.1CH, 2.0CH, ADV (Advance Audio) output mode via the switch:

- When switching to 5.1CH audio output, the digital audio signal receiving device must support DTS/DOLBY-AC3 decoding.
- When audio output is switched to ADV [Advance Audio] mode, the audio output format will be decided by the audio device and its audio decoding ability.

HDMI OUT: HDMI output interface.

GREEN LED: HDMI output led status light.

SPDIF: SPDIF optical output.

L/R: Analog soundtrack (L/R) output.

Trouble Shooting:

Issue	Resolution
No power Connected	Check if the power adaptor is plugged into the power socket. Check the power switch is on.
No Picture	Make sure that the TV is on and is connected to the device. Check if the signal source is on and correctly connected. Check the system connection quality. Check the cable quality (we recommend PROception HDMI cables with this device).
Obscure Picture	Reconnect the cable to ensure a solid connection and check HDMI cable quality.
No sound	Confirm the setting position of the audio mode switch.

Specifications:

HDMI resolution	24/50/60fs/1080p/1080i/720p/576p/576i/480p/480i
Support video color format	24bit/deep color 30bit,36bit
Audio output	L/R+SPDIF
Max bandwidth	300MHz
Max baud rate	9.0Gbps
Input/Output TMDS signal	0.5~1.5Volts p-p(TTL)
Input/Output DDC signal	5Volts p-p (TTL)
Input cable distance	≤15m AWG26 HDMI standard cable
Output cable distance	≤20m AWG26 HDMI standard cable
Max working current	500mA
Power adapter format	Input: AC (50HZ, 60HZ) 100V-240V; Output: DC5V/1A
Operating Temperature range	(-10 to +55°C)
Storage Temperature range	-20 to +60°C
Operating Humidity range	10 to 90%RH (No Condensation)
Storage Humidity range	5 to 95%RH (No Condensation)
Dimension (L x W x H)	84.5X61.8X21 (mm)
Weight	135g
