

ALWAYS CONNECTED WI-FI MOTION SENSOR WITH OVER 1 YEAR OF BATTERY LIFE

 [Watch the video](#)

POWERED BY SILICON LABS WI-FI IOT SOLUTIONS

New generation Motion Sensor with the lowest power consuming Wi-Fi modem in mass production in the world.

OVER 1 YEAR BATTERY LIFE

Featuring a 6500 mAh rechargeable battery that can last over 1 year, due to the ultra-low power consuming WiFi technology and Silicon Labs Wi-Fi IoT solutions.

REAL TIME RESPONSE

it detects motion in less than 200 ms – as fast as a blink of an eye! And can trigger immediate action by another device such as turning on the lights.

NO HUB REQUIRED

You can control Shelly Motion directly, no hub required. It is compatible with any Wi-Fi router. Or if you prefer you can connect it to your home automation platform.

CUSTOM ACTIONS

Shelly Motion can trigger other smart devices in your home network and customize the actions based on your needs.

FULLY COMPATIBLE

It is fully compatible with Alexa, Home Assistant, SmartThings, Windows/Mac, and other home automation platforms.

SMART SCHEDULING

Use Smart Scheduling to customize actions considering the day, hour, light intensity, sunset, or sunrise.

VIBRATION DETECTION

The motion sensor will detect the slightest vibration and inform you immediately.

SENSITIVITY ADJUSTMENT

Adjust extremely precisely the distance and the movement to which the sensor reacts.

TAMPER DETECTION

Shelly Motion will immediately inform you in case someone touches the device, tries to dislocate, or move it.
