

RJ45 connectors & boots

Articles No.: 155220/155221/155222/155230/155231/155232/155233

Product Description

TRIAX Push Through RJ45 CAT6 connectors are specifically designed for use with TRIAX Category 6 U/UTP cables, ensuring fast, reliable, and consistent performance in high-speed data network installations.

The push-through design simplifies termination by allowing conductors to pass through the connector, making wire alignment faster and more accurate. Simply arrange the conductors in the required sequence, insert the cable into the connector, and the internal guide automatically positions each conductor in the correct predefined order for a secure and professional termination.

The connector is terminated using the TRIAX TCC100 RJ45 Cut & Crimp Tool, which simultaneously crimps the connector and trims the excess conductors for a fast, clean, and professional installation.

To complete the installation, TRIAX RJ45 boots are available in four colors—Black, Blue, Red, and White—supplied in packs of 10 pieces for easy cable identification and strain relief.

RJ45 Connectors

- CAT6 Unshielded U/UTP RJ45 Push Through Connector
- Compatible with TRIAX Category 6 U/UTP cables
- Easy conductor alignment and termination
- Transparent crystal-clear housing for visual inspection (selected models)
- Supplied in jars of 100 connectors

Available Variants

Item No.	Model	Description
155220	TBC100	Jar of 100 Push Through RJ45 CAT6 connectors, crystal-clear plastic housing, 0.5μ gold-plated contacts
155221	TBC101	Jar of 100 Push Through RJ45 CAT6 connectors, crystal-clear plastic housing, 50μ gold-plated contacts
155222	TBC102	Jar of 100 Push Through RJ45 CAT6 connectors, metal housing, 50μ gold-plated contacts

RJ45 Boots

Designed to provide cable strain relief and color-coded cable identification.

Available Variants

Item No.	Model	Description
155230	TKB001	Bag of 10 Black RJ45 Boots
155231	TUB001	Bag of 10 Blue RJ45 Boots
155232	TRB001	Bag of 10 Red RJ45 Boots
155233	TWB001	Bag of 10 White RJ45 Boots
