

## Tile and Slate Clamp

The tile-and-slate clamp is a non-invasive fastening system with no drilling or lashing required. It can fit to the majority of tile or slate roofs in minutes. Suitable for the installation of aerials, zone 1 satellite dishes and security lighting/CCTV installations.

### Features

- ¥ Ideal where no chimney is available, e.g. terraced housing.
- ¥ Supplied boxed complete with all fixings and mast.
- ¥ Installations at roof height without unsightly large brackets or masting.
- ¥ Can be used as a permanent or temporary fixing.
- ¥ The three slide cleats are the key to the clamp. They make for easy and speedy fitting and also incorporate a safety feature on each cleat.
- ¥ Additional universal security interface to allows lighting/camera to be fitted. (TSC/GSI).
- ¥ Wind tunnel tested.
- ¥ Simple installation with full instruction included.
