

Silent Gliss

VERTICAL BLINDS

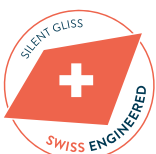

Vertical blinds reimagined

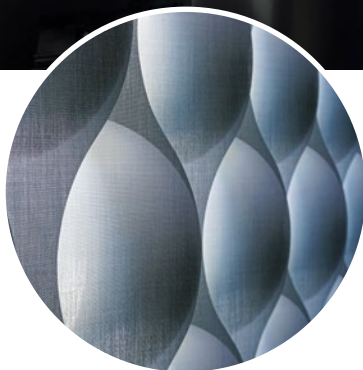

Silent Gliss vertical blinds mark the elegant return of a design classic – where precision meets style. Engineered for smooth, whisper-quiet operation, they offer precise control of light and privacy, whether manually operated or motorised.

A timeless design reimagined – vertical blinds transform expansive, floor to ceiling glazing. Choose from an extensive palette of premium fabrics, with colours, and textures to realise your vision without compromise.

PRECISION IN EVERY DETAIL

At Silent Gliss, quiet and smooth operation is a priority. Our vertical blinds use premium components, continuously refined to meet the highest standards. Whether in a commercial or residential interior they facilitate optimal light control.

VERTICAL WAVES

Silent Gliss Vertical Waves use shaped, laser cut louvres to transform a traditional blind into an architectural feature – ideal as a dynamic room divider or design statement.

For a more dramatic impact, our optional 3D-printed louvres will introduce additional visual texture and depth.

SMART BUILDINGS

Our motorised vertical blinds seamlessly integrate into world's leading building automation systems.

Alternatively, our Move app offers intuitive control. Individual systems or groups can be easily configured and controlled via a mobile device.

SUSTAINABLE

Silent Gliss products are manufactured within an environmentally friendly, safe and socially responsible framework. We strive for sustainable growth through the harmonisation of economical, ecological and social factors.

Engineered for light, designed for living

Renowned for their advanced engineering, Silent Gliss vertical blinds deliver precise control over light and privacy. Whether motorised or manually operated, their design ensures smooth, accurate adjustment.

For a seamless finish, they can be discreetly recessed into the ceiling.

CHAIN OPERATION

A stainless steel ball chain enables mono-control for opening, closing and rotation.

MOTORISED OPERATION

Motorised vertical blinds allow the finest adjustment at the touch of button.

A wide range of control options allows you to operate your blinds whenever and wherever you are. Choose our Move hub and App, or, integrate your shading into one of the leading home control systems.

Vertical Waves – elevated design

Developed in collaboration with Swedish textile designer Eva Marmbrandt, Silent Gliss has elevated its laser-cut vertical blinds with a striking effect. Available with an optional 3D printed finish, the louvres deliver dynamic light interplay and spatial depth – ideal for use as blinds or room dividers.

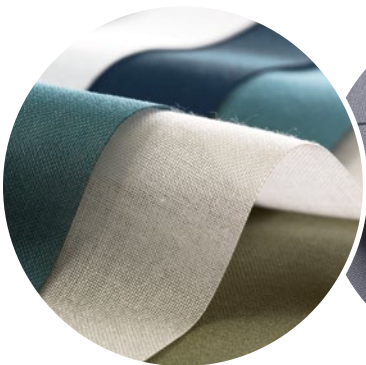

Fabrics — beyond decoration

The Silent Gliss Collection sets itself apart by considering both the fabric's texture and technical features. We offer a wide range of styles and colours that balance function and design across all of our window treatment systems.

We include fabrics with special functions such as acoustic performance, superior light management, antimicrobial and environmental considerations. All of our fabrics are flame retardant and have been extensively tested on our systems to ensure consistent hanging behaviour.

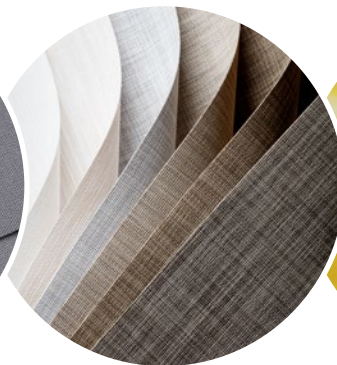

Check out the Silent Gliss online fabric finder.

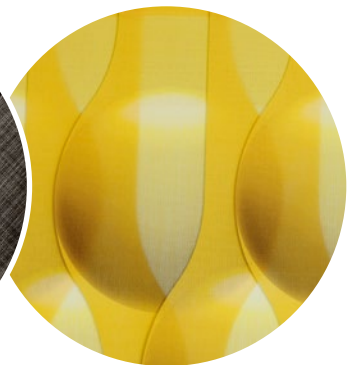

Our exclusive **Colorama** fabric is available in 30 colours

Colorama Bioactive, antibacterial with inherent silver ions, suited to healthcare environments

Multicolour Screen for a textured natural appearance

Multi Visio fabric for perfect print results
